EXECUTIVE INSIGHT

Nigeria's macroeconomic environment remains under moderate pressure as inflation, exchange rate depreciation, and rising debt continue to weigh on economic stability.

- Exchange rate weakened to ₦1,374.71/USD.
- Inflation remains elevated at 15.93%.
- Foreign reserves improved to \$51.25bn.
- External debt increased to \$51.86bn.
- GDP growth slowed to 3.89%.

Official Exchange Rate Trend (2015–2026)

EXECUTIVE INSIGHT

The official exchange rate remains significantly above its historical average, highlighting persistent depreciation pressures on the Naira.

While recent monthly movements suggest relative stability, yearly trends indicate a sustained structural adjustment in the foreign exchange market.

The 12-month forecast estimates an exchange rate of approximately **₦1,496.36** per US Dollar, implying continued pressure under current macroeconomic conditions.

Total Public Debt vs FGN Retained Revenue

(Trillions of Naria)

Fiscal Insight

- Public debt increased sharply to **₦144.67 trillion** in 2024, representing a 48.6% increase from 2023.
- Although FGN retained revenue also rose to **₦13.10 trillion**, debt service reached **₦13.12 trillion**, resulting in a Debt Service-to-Revenue ratio of **100.2%**.
- This indicates that virtually all retained revenue was absorbed by debt servicing, riighlting significant fiscal pressure.

Nigeria Headline & Food Inflation Trend (2015–2026)

Inflation insight

Price increases are slowing, which is a positive sign for the economy.

Headline inflation has declined to **15.93%**, while food inflation has eased to **10.50%**, indicating that the pace of rising prices is moderating.

However, inflation remains above comfortable levels, and households may still experience high living costs despite the recent improvement.
